Arnold Joseph Toynbee
Mankind and Mother Earth

From the last paragraph of his book:

“Will mankind murder Mother Earth or will he redeem her? He could murder her by misusing his increasing technological potency. Alternatively he could redeem her by overcoming the suicidal, aggressive greed that, in all living creatures, including Man himself, has been the price of the Great Mother’s gift of life. This is the enigmatic question which now confronts Man.”

South Dakota’s air and water quality must be protected if we are to preserve our way of life in this state. For the last thirty-four years the South Dakota Resources Coalition has been at the forefront of the fight to protect our state’s valuable resources. Our effective lobbying at the state legislature in Pierre since 1971 has helped to educate legislators about the environment and what needs to be done to assure that future generations will have clean air and water and a safe environment.

**BECAUSE SO MANY PEOPLE HAVE BEEN WILLING TO
HELP SUPPORT SDRC, WE'VE BEEN HERE
FOR SOUTH DAKOTA FOR MORE THAN 34 YEARS !
PLEASE WON'T YOU CONSIDER
JOINING US?**

**South Dakota NEEDS the South Dakota Resources Coalition!
Environmental values are being ignored or soft-pedaled in
Washington, Pierre and often in our local communities. Our
decision makers continue to neglect or give us short-sighted
"solutions" for energy shortages and blackouts, sprawl, polluted
air and water, global warming, and loss of wetlands, wildlife
habitat and biodiversity. SDRC will continue working to protect
our environment *but only with your help*. Because SDRC is a 501
(C) (3) organization, your contribution is tax deductible.**

Only in a viable natural world can there be a viable human world."

-----Thomas Berry

WHAT OUR FRIENDS SAY ABOUT US

"The quality of life for all South Dakotans is better thanks to many years of hard work by volunteers and staff of SDRC. Most South Dakotans don't know the coalition even exists, but their air and water are cleaner and healthier because of it. In my years as both a legislator and a journalist I have always been impressed with the group's determination, perseverance and expertise. I am thankful for all who help to keep the organization alive and active.

**Bernie Hunhoff
Editor & Publisher
South Dakota Magazine**

"I have worked very closely with the members of SDRC since my arrival in Congress in 1987, and can attest to both their commitment and their success. I have no hesitation at all in very highly recommending their work."

Senator Tim Johnson

"My staff and I have been privileged to enjoy a good working relationship with SDRC through the years. SDRC has been, and continues to be, an effective barometer of public concerns on natural resource issues. Their commitment to the public interest is a benefit not only to South Dakota but the world at large."

Former Senator Tom Daschle

**WILL YOU HELP
SOUTH DAKOTA
RESOURCES
COALITION
MAKE A
DIFFERENCE?**

Alone, a single individual doesn't have the time, the money, the resources, or the power to successfully combat those who would like to destroy South Dakota's environment. South Dakota Resources Coalition is made up of volunteers who care about the earth. Through your membership in South Dakota Resources Coalition we can continue to be a powerful environmental force in this state. Together, we can fight to preserve the land we value.
